SUMMARY

Software Engineer with 3+ years building production **Python and TypeScript** backend services, **API integrations**, and **LLM features** (RAG, tool calling, agentic workflows). Embedded with a client as **sole technical owner**, owning projects end to end from design to deployment, with a focus on reliability and automated testing.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, JavaScript (Node.js)
- **Backend & APIs:** FastAPI, Flask, Remix, REST, Webhooks, OAuth 2.0, asyncio, SQLAlchemy, Prisma
- **AI/LLM:** Claude API, OpenAI API, Retrieval-Augmented Generation (RAG), Embeddings, pgvector, Tool Calling, LLM Agents, Model Context Protocol (MCP), Prompt Engineering, Claude Code (agentic development)
- **Data, Cloud & Frontend:** PostgreSQL, MongoDB, Docker, DigitalOcean App Platform, GCP, React, Vitest

EXPERIENCE

Software Engineer **Jun 2025 – Present**
ECOM Consulting Inc. (Client: Interactive Life Forms LLC) – embedded Dallas, TX

- Designed and deployed a real-time **fraud detection service** (**FastAPI, PostgreSQL, React/TypeScript** on **DigitalOcean**) that scores every order from webhooks, flagging **100–150 risky orders/week** and saving **6–8 hours** of review weekly.
- Introduced **agentic development with Claude Code and MCP**, building reusable AI skills for service setup and deployment, and used them to ship a **2-repo GDPR/CCPA data-erase feature with automated tests in 1 day**.
- Developed a **RAG pipeline** using **FastAPI, PostgreSQL + pgvector**, and **Claude API** across **2,000+ products** to write personalized Klaviyo emails for **10,000+ subscribers**, cutting campaign creation from **~3 hours to ~15 minutes**.
- Built a shared **OAuth 2.0 authentication service** using **FastAPI** that serves store tokens to **5+ internal apps**, cutting auth setup for each new service from **days to minutes**.
- Engineered an **async multi-store sync pipeline** using **Python asyncio** with rate-limit handling, retries, and failure isolation, syncing **2,000+ products** across **4 regional stores** in **under 15 minutes** (down from hours).
- Shipped a **full-stack wishlist platform** using **TypeScript, Remix, Prisma, and PostgreSQL** with **25+ API routes** and a **Klaviyo event sync**, going from first commit to production in **2 weeks** with **150+ automated unit tests**.
- Created a **conversion analytics pipeline** using **web pixel events and order webhooks** that tracks wishlist-to-cart-to-purchase rates, replacing manual reports with a **live dashboard** used **weekly** by marketing.

Software Developer – Integrations **Jun 2024 – Jun 2025**
BirdieBox LLC Dallas, TX

- Designed a **Flask middleware on GCP** using **Odoo JSON-RPC and REST APIs** for two-way product and inventory sync, keeping **3,000+ SKUs** in sync **hourly** and removing **10+ hours** of manual entry weekly.
- Built an **internal sales portal** using **Flask and REST APIs** for client-specific pricing and draft orders, cutting order creation from **30+ minutes to under 2 minutes (93% faster)**.
- Automated **bulk discount-code creation** in **Python** with the **Shopify Admin API**, generating **1,000+ codes per run** and replacing a paid SaaS tool to save **$1,000/year**.
- Implemented **storefront features** using **JavaScript, HTML5, and Liquid**, including dynamic product displays and responsive layouts, improving mobile conversion by **~15%**.

Software Developer **Aug 2023 – Jun 2024**
Quality Matrix Inc Westborough, MA

- Built **REST APIs and MongoDB schemas** using **Node.js** for a coupon redemption platform, adding validation logic that cut duplicate redemptions by **~90%**.
- Delivered a **contractor rewards dashboard** with balance and transaction history, reducing support queries by **35%**.

Software Engineer **Jun 2022 – Aug 2022**
Ubique Networks Inc Los Angeles, CA

- Built **Flutter UI and real-time ordering features** using **Firebase Cloud Functions and Google Sign-In** for a startup pilot used by **200+ users**.

EDUCATION

University of Texas at Dallas – Master of Science in Computer Science **May 2023**
Lovely Professional University – Bachelor of Technology in Computer Science **Jun 2021**
